CONTEXT

The Remote Sensing Laboratory (RSLab) within the Department of Information Engineering and Computer Science, University of Trento, Italy is looking for a postdoctoral candidate with interest in the field of radar and SAR. The selected candidate will be part of a group of around 20 people at RSLab (including faculty members, post-docs and doctoral students). More information on the RSLab can be found at <http://rslab.disi.unitn.it/>. The position is offered initially for 1 year but can be extended up to 4 years.

SUBJECT

The PostDoc candidate will be involved in research work related to radar signal processing and data analysis in the framework of the “Radar for Icy Moon Exploration” (RIME) instrument currently under development in the context of the European Space Agency (ESA) mission JUICE (“Jupiter Icy Moon Explorer”). The selected candidate will actively work with the large international team of both the JUICE mission and the RIME instrument. More information can be found at the following links: RIME: <http://rslab-tech.disi.unitn.it/rime/> ; JUICE: <http://sci.esa.int/juice/>

APPLICATION PROCEDURE

Interested candidates can submit their candidature through the link available at the home page of the RSLab <http://rslab.disi.unitn.it/> where further information about benefits, requirements, deadlines and procedures can be found.
